ONE SMALL STEP FOR MAN, ONE **GIANT** STEP FOR PHARMACY...

Hello there, We all have goals in our businesses and personal life, just everything in general. The team are always working on **NEW** ways to assist you in reaching your goals, and speaking of goals here are some **ADDITIONAL** useful services that we offer to independent pharmacies...

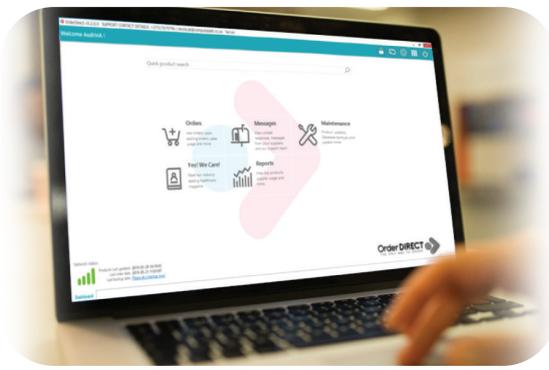

In the last year, things have changed and people have adapted to the new way of living, this includes **ONLINE SHOPPING**. Corporates had the facilities to let their customers shop online, and they could shop safely while **SOCIAL DISTANCING**.

Well, **GUESS WHAT? SO CAN YOU!**

The Pharmacy Shop has been created to benefit you as a pharmacy owner, as a "Second Business" that brings additional income to your store, with your pharmacy's stock file being available online and customers being able to see, order and pay before collection or delivery. Our **ONLINE PHARMACY SHOP** is available to our independent pharmacies, and it's **INTEGRATED**. No out-sourcing, no additional systems, no extra staff, no **STRESS**. The **PHARMACY SHOP** system links with your current Point of sale and Order Direct system.

BENEFITING YOUR PHARMACY

Sales & Purchases

It's **INTEGRATED!!!** Running our Pharmacy Software already has its benefits, but to add to that with the ordering system, Order Direct, **you can see your sales and purchases** for the current month and your past 12 months. Where else would you find such a helpful system...

Automated Ordering

Another exciting benefit that Order Direct offers is **"Automated Ordering"**, this means that the system will show you how many of a specific item is left, and what you will need to order in preparation for enough stock for the next 2 weeks!!! This all gets calculated on your sales of the items, you can also select items **NOT to feature** on these suggested order. You can edit your order before sending, YOU STILL MANAGE YOUR ORDERS!! How exciting is that?

Security Check

Order Direct comes with a secret **"security Check"**, when using our Windows software it will warn the stock receiver if at item has been received at a higher price than the ordered price. **ALSO...** it can show you when ordering an item, how many are currently on your shelves, **helping avoid over ordering** and sitting with extra stock on your shelves. These points alone, help you **save money in YOUR pharmacy.**

White Label

As a **Wecare member** with White Label set up, the White Label formulary pops up in your ordering system as it does in your Dispensing system. Meaning you can **order the items you get deals** on and helping you stay compliant and save money.

it's a BIG money saver for any Pharmacist.
